Subject – Sagro Fishling flights from LCA-TUU 2014

Dear Ioannis,

This is to confirm our support for Sagro Aquaculture and their program of flights planned from Larnaca to Tabuk carrying the fishlings, we have invested in moving both staff and equipment to Tabuk to ensure the safe operations of these flights.

The technical support given by Sagro Aquaculture to ensure that the equipment that they provide, meets with all the International and government approvals required, for safe carriage on board our aircraft. The professionalism of the Sagro Team makes it a pleasure to be part of this vital project in bringing these fishlings to Tabuk and starting a new industry for Saudi Arabia.

We look forward to operating further flights with Sagro very soon

Yours Sincerely

Steve Manser
